## Scientific Name Index

- |                                      |  |  |  |
|--------------------------------------|--|--|--|
| Acantosomeinidae                     | 145  |  |  |
| <i>Acerentomon</i>                   | 21   |  |  |
| Aculeata                             | 213  |  |  |
| <i>Aeshna</i>                        | 138, 144   |  |  |
| <i>Aeshna nigroflava</i>             | 127, 134, 135,<br>143, 144, 145,<br>148                        |  |  |
| Aeshnidae                            | 126, 134, 148  |  |  |
| <i>Ageniaspis fuscicollis</i>        | 273, 274, 275,<br>277, 278                                     |  |  |
| <i>Allacma fusca</i>                 | 31, 33, 35   |  |  |
| <i>Allonarcys proteus</i>            | 221  |  |  |
| <i>Alnus</i>                         | 175  |  |  |
| <i>Alnus inokumae</i>                | 159, 160   |  |  |
| <i>Amata</i>                         | 263  |  |  |
| <i>Amata fortunei</i>                | 172, 264   |  |  |
| <i>Ancylolomia</i>                   | 263  |  |  |
| <i>Anisolabis maritima</i>           | 152, 154, 155  |  |  |
| Anisoptera                           | 125, 126, 134,<br>147  |  |  |
| Anisozygoptera                       | 125, 126, 132,<br>147, 148                                     |  |  |
| Annulipalpia                         | 174, 175   |  |  |
| <i>Antheraea</i>                     | 250, 263, 264,<br>270  |  |  |
| <i>Apis</i>                          | 221  |  |  |
| Apterygota                           | 31, 33, 35,<br>69, 75  |  |  |
| <i>Arixenia jacobsoni</i>            | 155  |  |  |
| Arthropoda                           | 48   |  |  |
| <i>Athemus suturellus</i>            | 195, 196, 197,<br>199, 200, 201,<br>202, 203, 204,<br>205, 206 |  |  |
| Blattodea                            | 151  |  |  |
| Bombycidae                           | 237  |  |  |
| <i>Bombyx</i>                        | 181, 191, 193,<br>237, 238, 245,<br>250, 263, 270              |  |  |
| <i>Bombyx mori</i>                   | 65, 172, 181,<br>237, 264                                      |  |  |
| <i>Byasa</i>                         | 264  |  |  |
| <i>Byasa (Atrophaneura) alcinous</i> | 255, 256, 258,<br>262, 263, 264,<br>267, 268, 269,<br>270      |  |  |
| <i>Calandra</i>                      | 221  |  |  |
| Calopterygidae                       | 126, 127   |  |  |
| <i>Calopteryx atrata</i>             | 126, 127, 128,<br>129, 132, 145,<br>147                        |  |  |
| <i>Calopteryx virgo</i>              | 145, 147   |  |  |
| <i>Campodea</i>                      | 19, 21, 23,<br>24, 27, 29, 35                                  |  |  |
| Campodeidae                          | 23, 35   |  |  |
| Cantharidae                          | 195, 204, 206  |  |  |
| Cantharoidea                         | 195, 204, 206  |  |  |
| <i>Carausius morosus</i>             | 221, 222   |  |  |
| <i>Cercion sieboldii</i>             | 126, 129, 130,<br>132, 145                                     |  |  |
| Chalcidoidea                         | 207, 273   |  |  |
| <i>Charicodoma</i>                   | 221  |  |  |
| Cheleutoptera                        | 126  |  |  |
| <i>Chilo</i>                         | 233, 234, 263,<br>270  |  |  |
| <i>Chilo suppressalis</i>            | 145  |  |  |
| Coenagrionidae                       | 126, 129   |  |  |
| Coleoptera                           | 145, 195, 204,<br>206  |  |  |
| Collembola                           | 31, 37, 77,<br>121   |  |  |
| <i>Conocephalum conicum</i>          | 132, 133   |  |  |
| Corydalidae                          | 74, 225, 226   |  |  |
| Crustacea                            | 48   |  |  |
| <i>Culex tarsalis</i>                | 176  |  |  |
| Cydrinidae                           | 145  |  |  |
| Dacnonypha                           | 159, 160, 174,<br>175  |  |  |
| <i>Dahlnominus fuscipennis</i>       | 212  |  |  |
| Dermaptera                           | 151, 152, 155  |  |  |
| <i>Diacrisia</i>                     | 263, 264   |  |  |
| <i>Diacrisia virginica</i>           | 177  |  |  |

epineural sinus	152, 155	head lobe	117, 200
eversible sac	152, 155	heterocellular gap junction	19
external yolk	278	hibernation	136, 144
extraembryonic region	181, 191	holoblastic cleavage	92
		hydropylar area	152, 155
		hydropyle	172
fertilization membrane	185	hydropyle cell	
first blastodermic cuticle	114	hypertrophy	65, 237, 248, 250
first egg envelope	37, 45	hypocerebral ganglion	231, 234
first embryonic envelope	38		
flagellar axoneme	3	immersed type (embryo)	204
flexor mandibulae	269	immersion of embryo	155
follicle cell	19, 21, 57	inner layer	163
follicle cell differentiation	66	intercalary segment	117, 165, 200, 216, 218, 230
center		intercellular bridge	23
follicular cell	38, 45, 51, 61, 62, 65, 74, 282, 284	intermediate nurse cell	23, 24, 27, 29
frontal ganglion	230, 231, 234	invagination type (embryo)	155
frontal suture	204		
		juvenile hormone	63
ganglion	216, 228		
ganglion cell	216, 228, 240	katatrepsis	125, 126, 129, 146
ganglion mother cell	250, 253		
gastrulation	210, 212	labral rudiment	165, 169, 200
germ band	104, 117, 125, 145, 163, 173	long-germ	155
germ cell	207, 210, 212	longitudinal axis	146
germ cell determinant	82	(of embryo <i>etc.</i> )	
germ disk	163, 172		
germ rudiment	125, 145, 152, 155	mandibular apodemes	269, 270
germ type	155	median cord	216, 218, 221, 226, 228, 231
germarium	31, 33	median neuroblast	222
glial cell	245	meroistic type ovary	155
glial element	233	mesoderm	240, 250
Golgi apparatus	15	micropinocytosis	274
Golgi body	245	micropinocytotic vesicle	274, 277
		micropylar apparatus	53
Hallez's law	145	micropylar canal	161
hatching	134, 136, 138, 141, 144, 146, 204	micropyle	79
head capsule	248		

microtubule	8, 33	panoistic type ovary	155
microvilli	21, 38, 75, 274, 277, 284	perilemma	228, 233
middle plate	210, 212	perineurium	233, 245
mitochondria	3, 21, 24, 33, 71, 191, 240, 245, 277	periplasm	82, 152, 155, 172, 181, 185, 191, 198
mouth part	200	phospholipid	278
nebenkern	3	polar body	84, 274
nerve cell	226	polar granule	259, 261, 264
nervous system	225	pole cell	261
neural groove	167, 216	polyembryony	273, 274, 278
neurilemma	218, 221, 230, 233	polygerm	274
neuroblast	216, 219, 220, 221, 222, 226, 228, 230, 237, 240, 248, 250, 253	polytrophic type ovary	155
neurogenic region	240, 248, 250	post-revolution stage	129, 134, 139, 141
neuropile	216, 226, 228, 230, 242, 245	postvitellogenesis	27
neurosecretory cell	245	preantennal segment	117, 121
nuage material	24, 27	prefollicular cell	51, 52, 71
nucleolus	191, 240	premandibular segment	121
nurse cell	23, 24, 27	pre-revolution stage	129, 136, 143, 144, 169
oocyte	19, 21, 23, 24, 27, 29, 37, 38, 51, 52, 71, 74, 75	previtellogenesis	23, 24, 53, 57, 58, 71
oogenesis	23, 24, 27, 33, 37, 52, 65, 69, 74, 79, 82, 84, 155	primary dorsal organ	104, 107
oogonia	31, 71, 74	primary endoderm	207
oolemma	37, 38, 45, 57, 74	primary mid gut epithe- lium	210, 212
ooplasm	24, 37, 71, 181, 210	primary vitellophage	161, 198, 207, 210, 212
oosome	207, 210	primitive groove	163, 198
ovarian follicle	51, 65	primordial germ cell	155, 255, 259, 261, 262, 263, 264
		proctodaeum	207
		pronymph	134, 136, 138, 141
		proteid yolk	82
		prothoracic gland	269
		protocephalic lobe	230
		protocephalon	165, 198, 230, 237, 240, 248
		protocerebral lobe	200, 230
		protocerebrum	230, 242
		protocorm	165, 198
		pseudomicropyle	79
		pyronin-positive granule	182, 183, 185, 191, 193

recurrent nerve	231, 234	stomodaeum	119, 165, 207
respiratory horn (of egg capsule)	63	suboesophageal commis- sure	230
retardation	57, 65, 66	suboesophageal ganglion	218, 228
reticuloplasm	181	superficial cleavage	88, 92
revolution	124, 129, 132, 134, 136, 138, 139, 140, 142, 143, 144, 146, 147, 148, 169, 200	superficial type (embryo)	155, 204
revolution stage	129, 132, 134	supraoesophageal commis- sure	230, 233
ribonucleoprotein	192	tendril	107, 114
ribosome	8, 21, 24, 71, 245, 284	tertiary vitellophage	212
rotation	125, 126, 132, 134, 138, 139, 140, 141, 142, 146, 147, 148	tertiary yolk cleavage	100
rough-surfaced endoplas- mic reticulum	21, 24, 71, 182, 183, 193, 240, 245, 284	transverse axis (of embryo <i>etc.</i> )	146
salivary gland	210, 213, 269	tritocerebrum	230, 242
second blastodermic cuticle	104, 107, 114	trophamnion	273, 274, 278
secondary dorsal organ	177, 204	trophic cord	53, 54, 61
secondary vitelline mem- brane	161	trophocyte	27
secondary vitellophage	163	ventral nerve cord	216, 226, 237
secondary yolk cleavage	96	ventral nervous system	215, 221
serosa	104, 125, 144, 146, 173, 177, 210	ventral plate	146
short germ	155	ventricular ganglion	234
spermatid	1, 3, 12, 14, 15	vitellarium	71
spermatid chondriome	1	vitelline membrane	38, 45, 79, 100, 104, 114, 161, 182, 183, 185
spermatocyte	3	vitellogenesis	24, 27, 53, 57, 61, 62, 69, 74
spermatogenesis	1	vitellophage	96, 210, 212
spermatophore	78	yolk	82, 152, 172
spermiogenesis	3, 8, 15	yolk sphere	29, 181
star-spot duplication (silk- worm)	237, 245	yolk spherule	161
stomatogastric nervous system	231, 233, 234
